

The LA County Solar Map

solarmap.lacounty.gov

Interested in solar power, but don't know if your property is a good candidate?

The LA County Solar Map gives every resident or business a simple and fast way to find out whether you can save money and the environment installing solar panels.

Type in your address to find out your:

- ❖ Roof size
- ❖ System size you can install
- ❖ Electricity production per year
- ❖ Electricity savings in dollars per year
- ❖ Carbon reduction
- ❖ Nearby solar installations and case studies
- ❖ Available rebates from utility companies
- ❖ information about installers

The Solar Map uses an advanced solar engineering model which uses roof size, pitch, and shading from nearby trees, buildings, and mountains to provide a building's solar potential.
